

#SCREENSHOTS

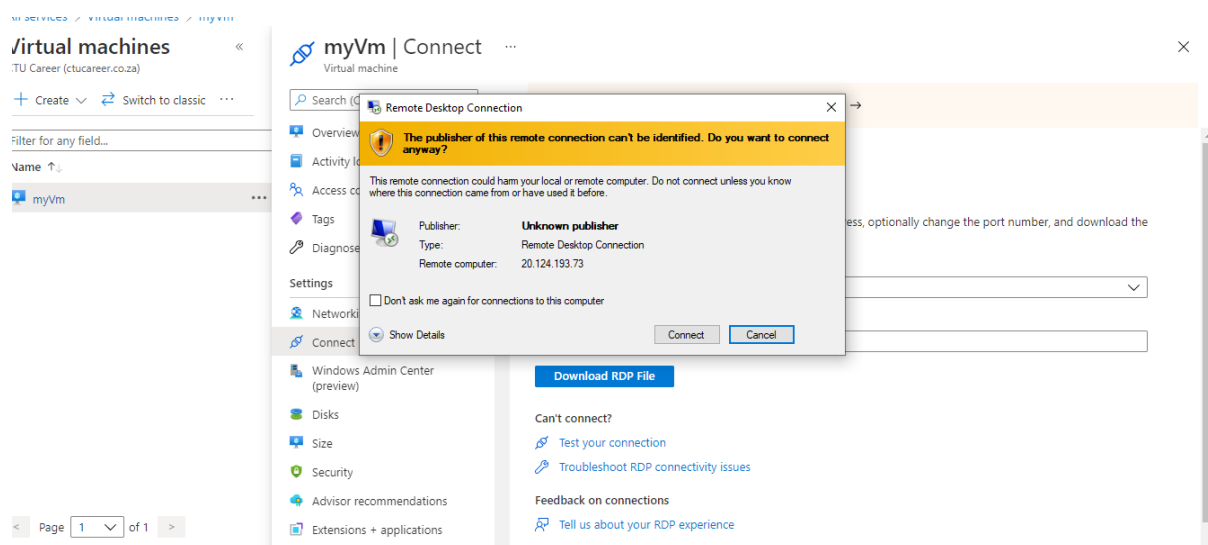

1. Virtual Machine Overview Page

Shows the Azure Portal dashboard with the VM running and details like public IP and resource group.

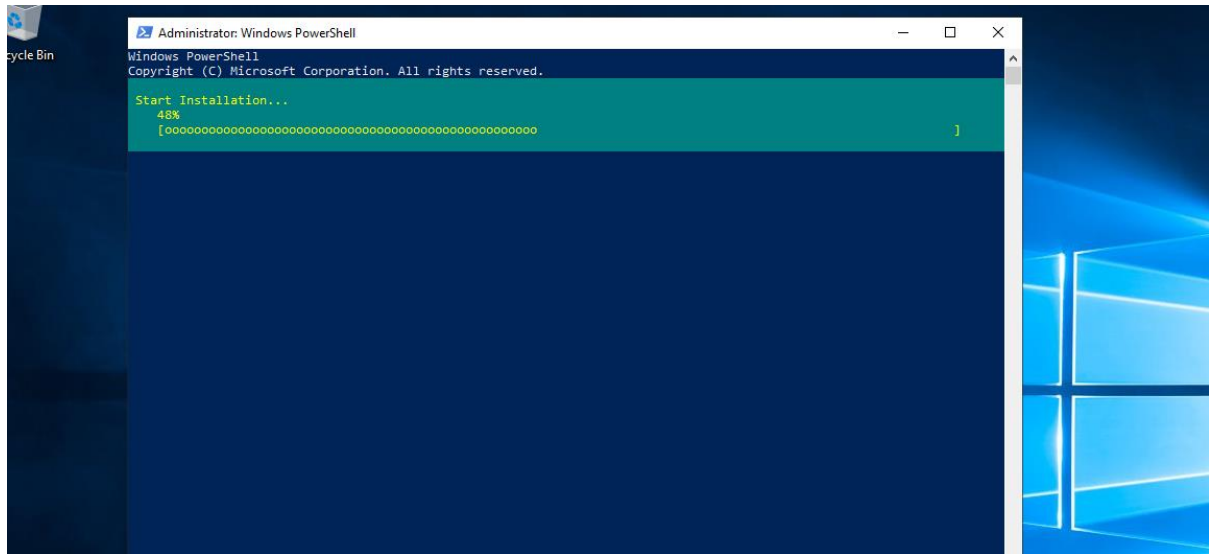

2. Connect to VM via RDP

Screenshot of the Connect blade showing RDP connection options or Azure Bastion

3. Installing IIS with PowerShell

Inside the VM, running the PowerShell command to install the Web Server (IIS) role.

4. IIS Web Server Welcome Page

Browser showing the default IIS page after accessing the VM's public IP.
